

Industrial Metal Display

RS-485 connectivity ensures reliable communication with the GT-9 fuel controller.

Large screen with clear digits for easy readability in various lighting conditions.

Long communication range of **up to 100 meters** for flexible installation options.

Industrial Metal Display

The Viotys Industrial Metal Display is a robust and waterproof IP67-rated display designed for industrial applications.

Equipped with an RS485 interface, it serves as an additional display for showcasing essential fueling information such as fueling amount, totalizer, and requested volume.

With its rugged construction and versatile functionality, the Viotys Industrial Metal Display is the perfect choice for industries requiring reliable and accurate display solutions in challenging environments.

The Viotys Industrial Metal Display is engineered to provide essential fueling information, including fueling amount, totalizer, and requested volume.

With its robust design and user-friendly features, the Viotys Industrial Metal Display is the ideal solution for industries requiring accurate and accessible fueling information at a glance.

Datasheet

INPUT VOLTAGE : **7 – 16 VDC**

DISPLAY : **3 lines**

BACKLIGHT : **YES**

PROTECTION : **IP67**

PROTOCOL : **VIOTYS display**

WEIGHT : **2.5 kg**

MATERIAL : **Stainless Steel**

TEXT COLOR : **White**

BUZZER : **YES**

RS PORT : **RS-485**

DIMENSIONS : **133 x 138 x 30 mm**

WORKING TEMPERATURE : **-40 to +85 °C**
